

CREATE AN **E-COMMERCE WEBSITE**. (*Gadget specific*)

THE E-COMMERCE WEBSITE SHOULD HAVE THE FF. WEB PAGES:

- Landing Page
- Home Page
- Order Form Page
- Order Confirmation Page

NOTE: *You will have 4 web pages in total.*

BELOW IS THE INSTRUCTION PER EACH WEB PAGE:

I. GENERAL

- All pages should have navigation bar
- It will be assumed that the only username to be used is your **surname (all lowercase)**.

II. LANDING PAGE

- Add **Bootstrap Carousel** of at least 3 images with **title** and **description** (*make sure that images have the same resolution/dimension*)
- Every time the user goes to this page, the **sessionStorage** should reset or be clear.
- Navigation bar in this page should have **login button** and **register button** only
 - login button should open a **bootstrap modal** with **username**, **password**, and **submit** button
 - register button should open a **bootstrap modal** with **name**, **email**, **username**, **password**, and **submit** button
 - *Note: when the submit button for both modals is clicked, it should check whether the username entered by the user is your **surname (all lowercase)**. If so, it should be redirected to the **HOME page**. Else, it should alert the user stating that the username entered is wrong.*

II. HOME PAGE

- Navigation bar in this page should have **VIEW CART button** and **username** only
- There will be **2 categories** of the selected type (*Sample Categories: Phone, Camera and Laptop*) having **3 items** each category.
- **Title/name of the category** should be visible in the web page.
- Each item should have the ff. elements: (1) **Title/Name**, (2) **Image**, (3) **Price**, and (4) **ADD TO CART** button
- Once the **image** of an item clicked, it should open a **modal** about the details of the item. Details should be (1) **Item Title/Name** (2) **Image**, and (3) **Short description** about the item. (*dynamic -- only one modal for all items*)
- Once the **add to cart button** is clicked the ff. should happen:
 - Item should be added in the Cart Summary
 - **ADD TO CART** button should be **disabled**
 - **Opacity** property of the item image should be **50%**

- Once the **view cart button** is clicked, it should open a **modal** showing the **Cart Summary** which contains the ff:
 - (1) list of items added to cart.
 - each item contains the ff. elements (1) **checkbox**, (2) **Item Name/Title**, (2) **Item Image**, (3) **Item Price**, and (4) **Quantity Input**, (5) **Remove button**
 - remove button** should remove the current item and **update total price**
 - quantity input** should update the **current price of the item** and **total price**
 - (2) **select all checkbox** and **remove all button**
 - select all checkbox** should select all the checkbox in the cart
 - remove all button** should remove all those items that are checked and **update total price**
 - (3) **total price** that should update once an item is added and/or removed
 - (4) **checkout button** (going to **ORDER FORM PAGE**)

Note: Everytime you remove an item, the ADD TO CART button of that item in the web page should be enabled and the opacity property of the item image should be 100%.

III. ORDER FORM PAGE

Use the below image as your reference on what should be on the web page.

← Back to Cart

Checkout Details
